JUNE 1999 - N° 109

EURO FLASH

French government debt news

① Record daily trading volume on the French government securities market: the threshold of EUR 140.3 bn per day was crossed for the first time in April 1999, confirming the strong upward trend observed since the beginning of the year. In April 1999, turnover on French government securities came to EUR 2,947 bn, including EUR 1,670 bn for OATs and EUR 1,277 bn for BTANs and BTFs.

② Strong demand for TEC 10 OATs. In line with its issuing policy, the Treasury continues to issue regularly TEC 10 OATs in 1999: the

January 2009 TEC 10 OAT was issued twice (on 1 April and 3 June 1999) for a total amount of EUR 974 m, in response to strong investor demand (the bid-to-cover ratio came to 3.3 in April and 4.4 in June). The technical characteristics and properties of this product (see page 4 for details) make it a reference instrument for hedging euro-denominated bond portfolios against a rise in long-term yields. Outstandings on the January 2009 TEC 10 OAT came to EUR 7.793 bn on 3 June 1999.

③ On 18 May 1999, INSEE, France's national institute of statistics and

EMU EVENTS

- ▶ **10 AND 25 MAY 1999** The ECOFIN Council held an in-depth debate on the Broad Economic Policy Guidelines (BEPG). These guidelines lay down a global and consistent three-pronged strategy: sound growth-oriented macroeconomic policies based on well-managed public finance and price stability; policies designed to improve overall operation of European labour markets; and structural reforms intended to improve the efficiency and flexibility of the goods, services and capital markets. The Ministers established priorities for 1999 and examined ways to foster innovation and to improve the coordination of economic policies between Member States via the Euro-11 Council. The resulting general consensus will enable the European Council in June to approve a final recommendation on the Guidelines.

FRENCH GOVERNMENT DEBT NEWS

- ▶ **APRIL 1999** Record daily turnover on French government securities, with the bar of EUR 140.3 bn crossed for the first time. This historic result confirms the trend observed on the secondary market over the past two months, during which the record had already been broken twice (EUR 136 bn in February, EUR 139.4 bn in March). In April 1999, trading volume on government securities came to EUR 2,947 bn, including EUR 1,670 bn for OATs and EUR 1,277 bn for BTANs and BTFs, i.e. a daily average of EUR 79.5 and 60.1 bn, respectively.
- ▶ **14 MAY 1999** Cedel International and Deutsche Börse Clearing merge into New Cedel International, the first step toward the creation of a single European clearing, delivery-settlement and custody platform for fixed-income products and equities, the European Clearing House. SBF-Bourse de Paris and Sicovam SA, the French central securities depository, will be founding partners in the new company, scheduled to be created in January 2000. They will be able to contribute their technical expertise, their clearing systems (Paris Clearing House) and RGV, the French high-speed DVP system designed for real-time delivery-versus-payment in central bank money. This initiative can be expected to speed up unification of the euro-denominated government bond market and further simplify access to the French government securities market for non-resident investors.

TEC 10 OATs ARE THE BENCHMARK ON THE FLOATING-RATE EURO BOND MARKET

Every quarter, TEC 10 OATs pay a quarterly coupon indexed on the TEC 10 index, the euro-denominated 10-year Constant Maturity Treasury, calculated by interpolating the yields of the two most liquid OATs with the closest maturities to exactly 10 years. The structure of TEC 10 OATs makes them an ideal instrument to hedge oneself against a rise in long-term yields, and a useful curve instrument. As the following graph shows, TEC 10 OATs are insensitive to uniform shifts in the yield curve but perform very well when the curve steepens. Another advantage of TEC 10 OATs is that they are floating-rate securities which offer a positive carry. All this explains the interest of investors for this product, reflected in high demand during the latest auctions and a strong rise in prices in recent weeks.

FRENCH GOVERNMENT SECURITIES

1999 auction calendar

OAT AUCTION CALENDAR FOR THE YEAR	OAT 1 st Thursday of the month	A fixed-rate 10-year line, of either the existing 4.00% April 25, 2009 OAT or another OAT line to be opened; if market conditions permit, other fixed-rate or floating-rate lines, either existing or to be opened, or inflation-indexed
BTAN SEMESTERLY AUCTION CALENDAR	BTAN 3 rd Thursday of the month	Lines auctioned during the first half-year of 1999 • BTAN 3.00% July 2001 • BTAN 3.50% July 2004
BTF QUARTERLY AUCTION CALENDAR	Each Monday	BTF 13 weeks, semester, or 1 year according to the calendar on the other side.

The Treasury reserves the right to cancel an auction listed on the calendar if exceptional market conditions warrant it, or to hold an extra auction according to its borrowing needs and market trends.

Furthermore, the Treasury reserves the right to create new, long- or medium-term during the year, or to issue further tranches of previous issues in accordance with market conditions. The Treasury also reserves the right to use banking syndicate issue procedures.

The exact nature of the Treasury issues will be communicated to the market in the days preceding each auction with information on the volume of the issues.
