French government debt news

Completion of the debt buy-back programme

France Trésor has wrapped up its debt buy-back programme of EUR 10 bn. By 23 November, the Treasury had repurchased EUR 9.65 bn worth of OATs (EUR 1.4 bn with maturities in 2001, EUR 2.6 bn with maturities from 2002 to 2005, EUR 3.65 bn from 2007 to 2009 and EUR 2 bn from 2025 to 2029). As announced, reversed auctions were used for 85% of the programme (EUR 8.5 bn). Private transactions were used for the remainder. Debt service for 2000 was raised by FRF 1.58 bn and for 2001 was lowered by FRF 4 bn after stripping out the impact of financing the buy backs.

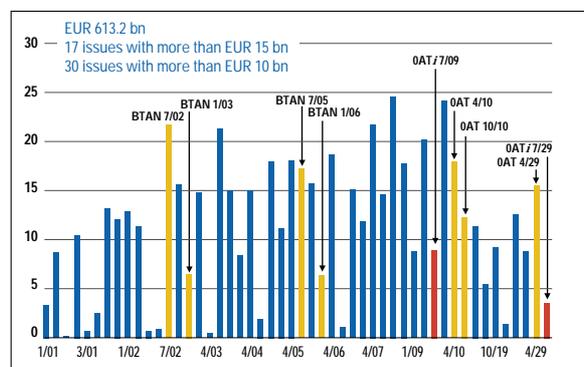

The government funding programme for 2001 and the new Debt Management Agency

On 6 December, Mr Laurent Fabius, the Minister of the Economy, Finance and Industry, announced the outline of the government funding programme for 2001 (see the attached data sheet). Net medium and long-term issues will amount to EUR 78 bn, reflecting a gross issuing programme of about EUR 80 bn (significantly down from the gross amount of EUR 90 bn issued in 2000) and debt repurchase of EUR 2.1 bn by *Caisse d'Amortissement de la Dette Publique* (CADEP). This will be financed partly from the proceeds of the UMTS licences to be sold next year.

Scheduled to be operational by the end of December 2000, the Debt Management Agency will pursue a more active debt and cash management strategy. The Agency can inter alia be expected to conduct additional repurchase and/or exchange transactions in 2001, market conditions permitting. It will moreover build up an interest-rate swap portfolio.

Positive outlook for euro bond markets

The benchmark 10-year OAT yield had been fluctuating within a 5.20%-5.60% range since the end of February. Two conflicting factors – inflation on the one hand and the economic slowdown and falling stock markets on the other – were neutralising each other, resulting in a directionless trend.

A comparison of inflation data at end-February and end-November shows that headline inflation in the euro zone climbed from 2.0% to 2.7% while core inflation increased from 1.0% to 1.5%. Even if one chooses to focus on core inflation, which we consider more pertinent than headline inflation when analysing bond yields, inflation has picked up speed.

In this seemingly negative context, the reasonable performance of OATs and indeed government bonds throughout the euro zone was made possible by two main factors: first, the market was convinced that the ECB's significant tightening cycle combined with the third oil price shock would bring about an economic slowdown; secondly, starting early August, the slowdown in the euro zone became increasingly evident and more widely acknowledged by the market. The downward revision of growth and corporate earnings forecasts in the euro zone and internationally triggered the world stock market correction. As usual in similar circumstances, the combination of an economic slowdown and a stock market correction put downward pressure on government bond yields: competition from stock markets and large corporate issuance programmes gave way to risk aversion and flight to quality, thereby bringing down long-term bond yields and helping to limit the decline in stock market indices.

On Thursday 30 November, the yield on the 10-year OAT broke out of the lower end of its 5.20%-5.60% range. But we do not expect the movement to last very long. Oil prices remain on an upward trend; somewhat excessive investor pessimism is likely to deepen further; the scaling back of international growth and corporate results is not over yet and stock market indices could well fall further. Given this situation, nominal government yields could well test new lows, like at end-1998 and early 1999, resulting in unusually low real yields (a nominal 10-year euro yield of 4.90% would correspond to a real yield of only 3.20% assuming core inflation of 1.70% at year-end).

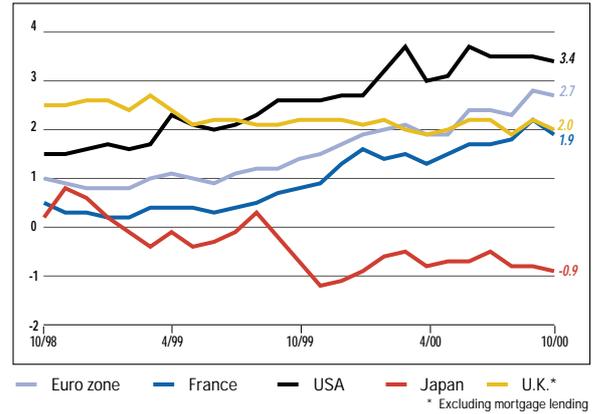

However, bond yields will probably not be able to remain so low for very long even if their increase remains moderate over the medium term. Once the price of oil has peaked, the world economy starts to pick up and investor confidence gradually returns, 10-year OAT yields will probably return to a 5.20%-5.60% range which is consistent with sustained growth and moderate inflation.

French government indicative financing program for 2001

*Mr. Laurent Fabius, Minister of the Economy, Finance and Industry,
has adopted the outline of the government funding programme for 2001*

Results for 2000: the government will complete its entire medium and long-term gross borrowing programme for 2000 (EUR 48 bn worth of Obligations Assimilables du Trésor - OAT - and EUR 42 bn worth of Bons du Trésor à intérêts annuels - BTAN). Moreover, France Trésor repurchased EUR 10 bn worth of securities through four reverse auctions and several private transactions, which enabled it to achieve its objectives. This repurchase campaign combined attractive prices with preservation of overall debt liquidity.

The general increase in interest rates made it impossible to keep financing terms at the low level reached in 1999. As a result, the average borrowing rate rose to 5.08% for BTANs and 5.43% for the 10-year OAT. The average maturity of the negotiable debt on 31 October 2000 was about 6 years and 90 days, compared with 6 years and 99 days on 31 December 1999. Internationalisation of the French debt continued. As of end-September, 28.4% of the debt was held by non-resident investors.

Programme for 2001: the amount of net medium and long-term issues needed to cover the government borrowing requirement will be lower than in 2000, inter alia because of government measures to reduce the budgetary deficit. **This amount will be about EUR 78 bn.** It should be covered by net OAT issues of about EUR 42 bn and net BTAN issues of about EUR 36 bn. These estimated objectives reflect net receipts for each class of securities, as applicable after exchange for new issues or repurchase during the year.

Borrowing requirement	2000		2001	
	FRF	EUR	FRF	EUR
Budgetary deficit (1)	209.0	31.9	186.0	28.4
Government commitments	8.0	1.2	8.4	1.3
Long-term debt redemption	93.0	14.2	99.7	15.2
Medium-term debt redemption	283.0	43.1	239.5	36.5
UMTS receipts earmarked for CADEP			-14.0	-2.1
Total	593.0	90.4	519.5	79.2
Funding sources				
OAT	314.9	48.0	276.2	42.1
BTAN	275.5	42.0	249.9	38
Repurchased debt (2)	-65.6	-10.0	-14.0	-2.1
Net medium and long-term financing	524.8	80.0	512.1	78
Net change in BTFs	66.9	10.2	42.7	6.3
Change in Treasury correspondents' deposits	-82.2	-12.5	-34.0	-5.2
Change in the Treasury account (3)	83.5	12.7	0.0	0.0
Total	579.0	88.3	520.8	79.2

The figures in italics will be adjusted to reflect the outturn at the end of the year

(1) Budgetary deficit of the Supplementary Budget Act for 2000 and the Initial Budget Bill for 2001

(2) Debt repurchased by France Trésor in 2000 and debt to be repurchased by Caisse d'Amortissement de la Dette Publique (CADEP) in 2001 (insofar as known)

(3) A plus sign indicates a decrease in the Treasury liabilities at the Banque de France

We have not changed the principles and conditions of our issuing policy save for a few specific points. It should be remembered that:

- the Agency reserves the right to issue securities other than benchmark securities during the year if there is a demand among market operators. Similarly, the Agency reserves the right to issue only one security when launching a new OAT or BTAN;
- the OAT programme for retail investors will be continued on the technical terms in force in 2000;
- France Trésor will regularly continue to issue new lines of existing variable-rate OATs and OAT*i*. In close collaboration with the primary dealers (SVTs), France Trésor will also examine the feasibility of issuing new bonds in each of these compartments. This will depend on market conditions;
- moreover, in order to match supply and demand as precisely as possible, the Treasury has slightly modified its OAT*i* auction policy: in the future, it may issue OAT*i* on the afternoon of OAT or BTAN auctions.

In 2001, two new 5-year benchmark BTANs will be issued. From now on, the Agency will publish a quarterly update on scheduled BTAN lines.

Organisation of a debt management Agency: to be launched officially before the end of the year, this Agency will be charged with government debt and cash management. To enable it to accomplish this assignment on optimum conditions, its organisation will consist of several units or departments charged respectively with:

- market transactions, notably debt instrument issues and auctions, loan exchanges and repurchases, and derivatives transactions;
- back office operations and risk control;
- management of the government's cash position, including projections, exchange with Treasury correspondents and investment transactions;
- communication on government securities and relations with market operators and investors;
- follow-up and analysis of developments on the rate markets and relations with financial analysts.

The Agency will have the human and technical resources necessary to accomplish its assignments. It has already begun to hire market professionals. This recruitment drive will be maintained in 2001. The Agency will manage all budgets connected with government debt and cash management, including IT and communication.

In order to make these services as transparent and understandable as possible, the government has submitted an amendment to the Supplementary Budget Act for 2000, which provides for the creation of a trade account entitled "active government debt management". This account will record the receivables and payables of the active management transactions authorised by Parliament, i.e.:

- currency and rate swaps;
- purchase and/or sale of government securities options or futures.

This account will track these transactions according to the rules of France's general business accounting plan, which will facilitate understanding and permit useful comparisons with other bond issuers in France and other countries.

Every year, a report on the transactions recorded in this account and on government debt management will be annexed to the Budget Bill. Moreover, this trade account will be subjected to a contractually agreed annual audit, focusing on the financial statements, the prudential procedures and the overall activity of the Agency as well as their impact on the cost of debt.

Designed to ensure even more active government debt management, the above initiatives need to be accompanied by a pro-active policy of transparency and information for Parliament and our fellow citizens.
