French government debt news

France Trésor will become a debt agency

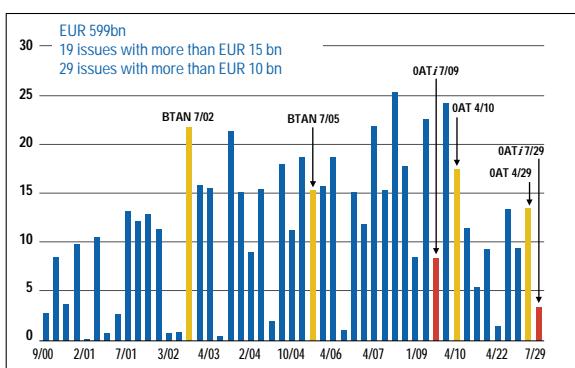

In his address to the Europlace symposium on 11 July, Laurent Fabius, Minister of the Economy, Finance and Industry, announced that France Trésor will shortly become a debt agency with direct accountability to the Treasury Director and with the technical and human resources necessary for more active debt management, *inter alia* reflected in the implementation of a rate swap portfolio. The first Managing Director of this agency will be Sylvain de Forges, currently financial advisor in London, who has extensive know-how of the fixed-income markets.

A buy-back programme of EUR 10 billion

Laurent Fabius further announced that France Trésor will carry out a buy-back programme of EUR 10 billion in the second half of the year. This will take the form of over-the-counter repurchases and reverse auctions. The contemplated amount of buy-backs reflects the good outturn in fiscal 1999, which ended on a financing surplus of EUR 2.3 billion, a better-than-expected budgetary outturn in 2000 with about EUR 4.5 billion more than projected, and the decision to increase BTF issues in the months ahead in order to meet steadily growing demand for this type of security, which enjoys benchmark status at the short end of the European yield curve.

Euro Zone Inflation to Stay Moderate

The Euro Zone's headline consumer price index (HCPI) grew 2.4% on a yearly basis in June. Against the backdrop of the bigger than expected rise of retail prices in Germany an increase of Euroland's price level to well above the 2%-mark in July appears again very likely. Should we for all that worry about a long-lasting return of inflation?

In our opinion, the answer to this question is negative. Merrill Lynch foresees on the opposite a marked slowdown of the price progression in the Euro Zone, which would drop from an average of 2.1% this year to 1.4% in 2001.

The recent augmentation of the consumer price index is essentially imputable to the strong rise of energy goods prices (notably petrol products), which have been increasing at a yearly rate of more than 10% since December 1999. Excluding energy, prices were indeed only up 1.2% in June! Were however this evolution to endure, it could -as the ECB reminds it- start to impact on prices of non-energy manufactured goods and services. It seems however in our view by far more likely that crude oil prices will progressively come back to levels more in accordance with economic fundamentals and that the Euro will slightly recover against the dollar. Both would mechanically induce a notable decrease of the global price index in the Euro Zone.

Worth to notice is also that the diffusion effect of higher import prices on retail prices remains pretty weak. In spite of the continuous rise in petrol products prices for about one year and the almost uninterrupted weakening of the Euro against the dollar since its creation the core inflation rate indeed has almost stagnated for now more than a year (1.3% in June, see the focus graph).

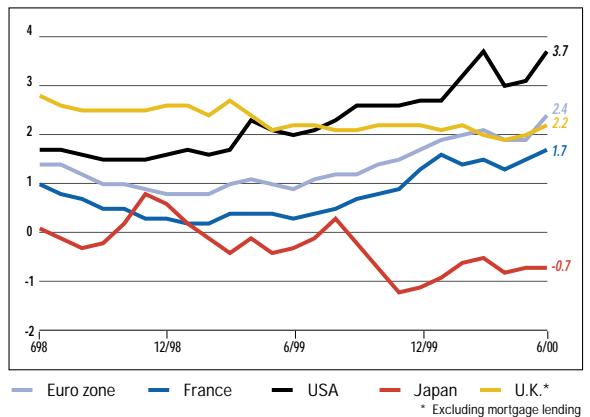

The intensifying of competition on both national and international level has certainly a lot to do with this. In order to avoid the loss of market shares companies adapt their production tools, as the noticeable expansion of investment goods' production since several months in the Euro zone indicates (10.9% year over year in May). The productivity improvement and the increase of production capacities that follow, allow in the actual stage of the growth cycle profits to rise without tension on prices. Additionally salary restraints, the continuation of an employment policy in the Euro zone based on the lightening of the tax burden of companies and on the deregulation of the labour market all work in the same direction. It is finally worth to mention that the 200 basis points increase of the three months interest rates since November 1999 should start exerting restrictive effects on the Zone's economy. There is thus in our opinion no stringent reason to worry about the inflation's evolution in the Euro zone in the foreseeable future.

Patrick MANGE, Merrill Lynch France S.A.

OAT : OAT indexée sur l'inflation.

TRA : taux révisable, en fonction des taux de rendement des emprunts d'État à taux fixe d'échéance supérieure à 7 ans, publiés par la Caisse des dépôts et consignations.

TME : moyenne arithmétique des taux de rendement moyens mensuels des emprunts d'État à taux fixe d'échéance supérieure à 7 ans sur l'année précédant la date de mise en paiement du coupon.

TEC 10 : taux de l'échéance constante à 10 ans.

OAT : inflation-indexed OAT.

TRA : variable rate based on the yields of all fixed-rate French Government bonds (EE and OATs included) with maturities greater than 7 years, as published by the CDC.

TME : the coupon rate is the arithmetic mean of the monthly average of all fixed-rate French Government bonds (EE and OATs included) with maturities greater than 7 years. The coupon rate is fixed every January based on the previous calendar year.

TEC 10 : 10-year constant maturity Treasury.

1 euro = 6,55957 FRF

2000 auction calendar

OAT AUCTION CALENDAR FOR THE YEAR	OAT 1 st Thursday of the month	A fixed-rate 10-year line, the April 25, 2010 OAT or another OAT line to be opened; if market conditions permit, other fixed-rate or floating-rate lines, either existing or to be opened, or inflation-indexed.
BTAN SEMESTERLY AUCTION CALENDAR	BTAN 3 rd Thursday of the month	Lines auctioned during the second half-year of 2000 <ul style="list-style-type: none"> • BTAN 4.50% July 2002 • BTAN January 2003 • BTAN 5.00% July 2005 • BTAN January 2006.
BTF QUARTERLY AUCTION CALENDAR	Each Monday	BTF 13 weeks, semester, or 1 year according to the calendar on the other side.

The Treasury reserves the right to cancel an auction listed on the calendar if exceptional market conditions warrant it, or to hold an extra auction according to its borrowing needs and market trends.

Furthermore, the Treasury reserves the right to create new, long- or medium-term during the year, or to issue further tranches of previous issues in accordance with market conditions. The Treasury also reserves the right to use banking syndicate issue procedures.

The exact nature of the Treasury issues will be communicated to the market in the days preceding each auction with information on the volume of the issues.
