## French government debt news

### Paris vindicates its ambitions on bond markets

On 19 May, ParisBourse<sup>SBF</sup> SA hosted a large event attended by the major players on bond markets. The event was organised around three round tables, culminating in a closing address by Jean Peyrelevade, Chairman of the AFCEI Committee for Financial Activities. The discussions focused on a few topical key issues: the launch of MTS France, the electronic trading system used for all French government securities, the strengths mustered by French debt to form a benchmark yield curve for the euro area, the emergence of high-yield corporate loans and, lastly, renewal of the Euronotionnel futures contract. The speakers notably expressed satisfaction at Euronotionnel's recovery of liquidity since the beginning of 2000. They stressed that the quotation bracket is only one tick, that the gross open position averages more than 500,000 contracts and that the daily trading volume has soared from 25,000 to 250,000 lots in only six months. Moreover, trading in Euronotionnel options was resumed in April.

### UMTS licences: EUR 19.8 billion

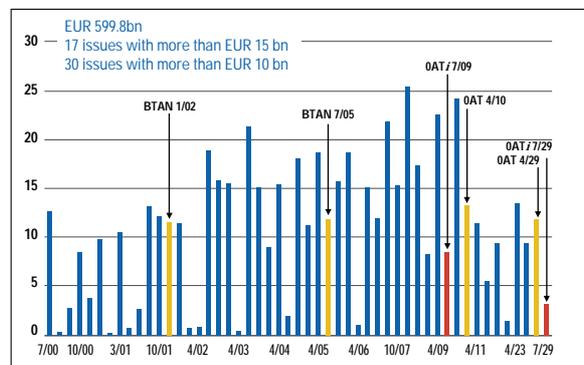

On 6 June, Laurent Fabius, Minister of the Economy, Finance and Industry, announced that the UMTS licences will be awarded after comparison of the candidates' merits. In all, four 15-year licences will be attributed. Each licence is valued at FRF 32.5 billion (EUR 4.95 billion). Half of this fee must be paid during the first two years (2001 and 2002). The balance will be spread over the remaining 13 years. The proceeds will not be used to defray current expenditure but mainly to help consolidate the Pension Reserve Fund and so to reduce France's debt.

### France Trésor's publications in japanese now available on the web

[www.francetresor.gov.fr](http://www.francetresor.gov.fr) permits direct access in three languages (French, English and German) to all information available about French government issuing policy. Reference publications in japanese - monthly bulletin, annual review and annual report - can now also be downloaded.

### Could European Treasury markets take the lead?

Since the beginning of the year, bond markets on both sides of the Atlantic have been behaving rather erratically. There are 2 main reasons for this. First of all, investors have always been uncomfortable with tightening monetary conditions. Their expectations aren't very stable. Thus, for a given yield and depending on what they believe the future central bank rate hikes to be, their interest in the treasury market changes.

Second, one must also consider the arbitrage opportunities between stocks and bonds. There are always times when bonds are preferred over stocks, even in an environment of tightening monetary policy. Given this frame of work, changes in the euro-dollar rate can be considered an important element of differentiation between the US and Euro bond markets.

During the next few months, which one has the best chance of outperforming the other?

Up to now, although US short-term rates weren't yet at a peak, an evermore-uncertain euro was working against the Old Continent. However, situation could well reverse itself in the future. As a matter of fact, why not by summer's end? European paper would then have the advantage over the New World. Three different reasons could explain this in an environment characterised by the easing of long term US rates. First, the euro would strengthen, pushing towards international arbitrage in favour of European treasuries. Then, as US long-term bonds become rarer, European bonds could well turn out to be more attractive. Finally, the supplemental fiscal income coming from third generation mobile phone licenses should have a very positive effect on the already better European central government budgets. Of course, if all is to go as planned, the actual expectations for European monetary policy need to be stable. Today, the odds seem reasonable.

## 2000 auction calendar

<b>OAT AUCTION CALENDAR FOR THE YEAR</b>	OAT 1 <sup>st</sup> Thursday of the month	A fixed-rate 10-year line, the April 25, 2010 OAT or another OAT line to be opened; if market conditions permit, other fixed-rate or floating-rate lines, either existing or to be opened, or inflation-indexed.
<b>BTAN SEMESTERLY AUCTION CALENDAR</b>	BTAN 3 <sup>rd</sup> Thursday of the month	Lines auctioned during the first half-year of 2000 • BTAN 4.00% January 2002 • BTAN 5.00% July 2005.
<b>BTF QUARTERLY AUCTION CALENDAR</b>	Each Monday	BTF 13 weeks, semester, or 1 year according to the calendar on the other side.

The Treasury reserves the right to cancel an auction listed on the calendar if exceptional market conditions warrant it, or to hold an extra auction according to its borrowing needs and market trends.

Furthermore, the Treasury reserves the right to create new, long- or medium-term during the year, or to issue further tranches of previous issues in accordance with market conditions. The Treasury also reserves the right to use banking syndicate issue procedures.

The exact nature of the Treasury issues will be communicated to the market in the days preceding each auction with information on the volume of the issues.
