French government debt news

A successful introduction for the new 10-year OAT

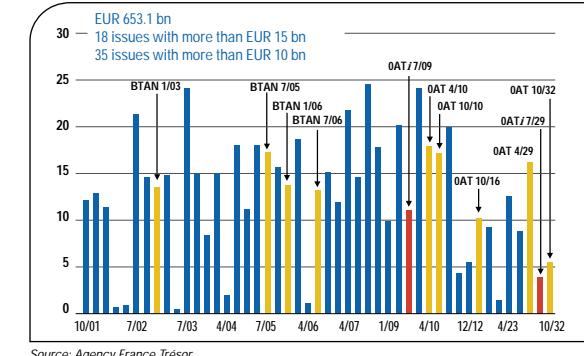

The new 5.00% October 25, 2011 OAT has been warmly welcome at its introductory auction on September 6. EUR 4.378 billion were auctioned, with bids reaching EUR 13.51 billion. These volumes, both auctioned and bid, represent historic records. When non competitive bids are taken into account, the size of the new OAT currently surpasses EUR 5 billion. Seven primary dealers (SVTs) have each been auctioned more than EUR 250 million worth of the new OAT, which demonstrates the present attractiveness of the French sovereign bonds. It also explains why the prices of French debt have tended to appreciate on the market. As a result, the new 5.00% 2011 OAT can from the outset be regarded as a European benchmark. It is traded both on MTS France and on Euro MTS.

Progress of funding programme for 2001

France's borrowing programme for 2001 was fixed at EUR 80 bn (compared with a result of EUR 90.2 bn in 2000). Agency France Trésor planned to issue EUR 42 bn and EUR 38 bn worth of OATs and BTANs, respectively (and to increase the stock of BTFs by EUR 6 bn).

How far is this programme advanced and what have our principal partners achieved so far?

The Agency had already placed 76% of the announced amounts by the end of August, even though only two-thirds of the year had passed (including 64% and 86% for BTANs and OATs, respectively). This was significantly more than last year at the same time. Even if the amount issued by end-June was in line with the outturn projected in the Initial Budget Act (achieved for 58%), the Agency is well in advance of its borrowing targets, especially in the long-OAT segment, helped by the Q1 launch of two new bond issues, one in the 15-year segment (5% 10/2016) and one in the 30-year segment (benchmark 5.75% 10/2032), and the repeated issue of OAT*i*, bonds indexed to French inflation.

Not all our partners in the euro area are in this situation. For instance, the Bundesbank (like the US Federal Bank) has issued only 66% of the announced amount (EUR 71 bn), whereas Italy always issues its BTPs very early in the year (82% of the announced programme, or EUR 84 bn) because of high refinancing requirements in the first half.

Agency France Trésor is therefore successfully forwarding its primary mission, viz to provide the French State with competitive finance. Moreover, the securities marketed by the Agency demonstrate its ongoing focus on innovation, making OATs benchmark securities across the entire euro-denominated yield curve. The BTF - the short-term paper - provides additional flexibility, e.g. should the budget be exceeded, which makes it unnecessary to modify the medium and long-term borrowing programme. Note that this policy combines with an active and effective government debt management policy, as witness the announced recourse to interest-rate swaps.

It will be interesting to observe the evolution of the spread between the 10-year OAT and the Bund in this very positive context for the Treasury and with fewer French issues in the 10-year bracket (EUR 8.7 bn less than in the first eight months of the year). The premium paid for Bunds and German futures when these were the only hedge instruments continues to decrease. Moreover, the economic slowdown in the euro area has a negative impact on budgetary deficits, which are lifted in varying degrees. The German deficit can be expected to deteriorate more significantly than its French counterpart. This will affect future issues, especially if Germany decides to issue a new 10-year bond (not yet planned) before the end of the year. Combined with the progress of the Agency's borrowing programme, these factors are likely to give French government securities a clear edge in terms of spread.
