French government debt news

French debt continues to attract an international following

The figures reported by the primary dealers to France Trésor show that non-resident investors continued to become more interested in Treasury securities in 2000. Net purchases of securities with maturities of over one year by this class of investors amounted to about EUR 40 bn, i.e. 50% of net issues for the year. In other words, the negotiable debt held by non-residents continues to rise rapidly (29% at the end of October, according to the most recent balance of payments statistics). This internationalisation is of course driven by the portfolio adjustments made by investors in the euro area (40% of net purchases by non-French investors) as well as strong interest by European investors from outside the euro area (34%) and from outside Europe (26%), mainly Asia.

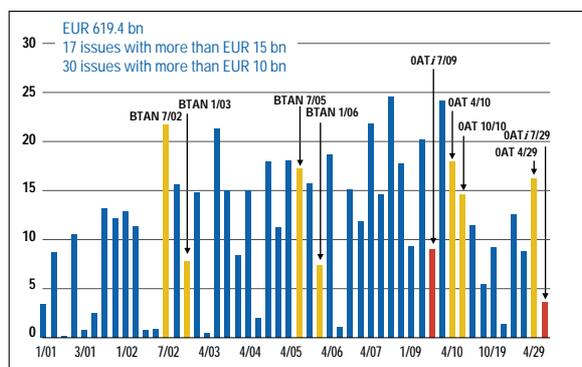

Lower borrowing requirement than last year

The gross medium and long-term borrowing programme for 2000 was fully completed (EUR 48 bn of OATs and EUR 42 bn of BTANs). The government further repurchased EUR 10 bn worth of securities during four reverse auctions and private transactions, enabling it to achieve its objective of repurchasing securities offering a price opportunity while preserving overall debt liquidity.

The amount of net medium and long-term issues necessary to cover the State's borrowing requirement in 2001 is lower than in 2000, mostly owing to the government's efforts to reduce the budget deficit. The borrowing requirement amounts to EUR 78 bn and will be covered by net OAT issues of about EUR 42 bn and by net BTAN issues of about EUR 36 bn. For each group of securities, these estimated objectives include net cash revenue from securities if any exchanged for new issues or repurchased during the year.

Reaping the benefits of structural reforms in France

The year 2000 has been a good macroeconomic vintage : growth should come out close to 3.2%, and inflation should not exceed 1.6% on average, in spite of the threefold increase in oil prices. These good records have enabled France Tresor to reduce net debt issuance, through buy-backs since last autumn and through a marked reduction of the auctions' programme for 2001.

This strong economic performance would not have been possible without the contribution from structural reforms. We think they have raised potential growth by near half a percentage point to about 2 3/4% per annum since 1996, whereas average growth since 1974 had settled to a slim 2 1/4%. Significant progress has been made on two main fronts: improved flexibility in the labour market, and stronger exposure to competition of formerly regulated markets.

As far as the labour market is concerned, more than a million new jobs were created over the period 1999-2000, dragging the unemployment rate down close to 9%, its lowest level since early 1991. Reforms were mostly concentrated on strong cuts in employers' social contributions for low paid workers and were gradually implemented as from 1992. They now partly offset the extra hourly wage cost bearing on businesses which switched to the 35-hour workweek, so that early beneficial effects of work sharing are not diluted too quickly. Moreover, labour market flexibility has also increased somewhat : part-time jobs are much more used, temporary contracts are also more accessible when needed, and worktime is accounted on a yearly basis allowing for strong seasonal fluctuations. Finally, the social climate has also significantly improved, as negotiations between unions and employers are now more clearly oriented towards job creation than wage claims.

Some important improvements have also been recorded in other spheres of the economy. Several sectors have been exposed to a more competitive environment, such as air transportation, telecommunications and energy. Such changes have triggered price declines at the level of consumers. More generally, the consequences of the Single market have led to low inflation, despite mounting pressures on the supply side.

This illustrates the benefits of structural reforms in France during the second half of the late 1990s. One can sum them up into a fall in structural unemployment : from 10-11% in the middle of the decade, the Nairu has probably declined down to below 9%, a two percentage points reduction in structural unemployment that resulted into a temporary higher potential growth. Further reforms may prove necessary in the future to extend these improvements.

2001 auction calendar

OAT AUCTION CALENDAR FOR THE YEAR	OAT 1 st Thursday of the month	A fixed-rate 10-year line, the October 5.50%, 2010 OAT or/and another OAT line to be opened; if market conditions permit, other fixed-rate or floating-rate lines, either existing or to be opened, or inflation-indexed.
BTAN QUARTERLY AUCTION CALENDAR	BTAN 3 rd Thursday of the month	Lines auctioned during the first quarter 2001 • BTAN 5.00% 01/2003 • BTAN 5.00% 01/2006.
BTF QUARTERLY AUCTION CALENDAR	Each Monday	BTF 13 weeks, semester, or 1 year according to the calendar on the other side.

The Treasury reserves the right to cancel an auction listed on the calendar if exceptional market conditions warrant it, or to hold an extra auction according to its borrowing needs and market trends.

Furthermore, the Treasury reserves the right to create new, long- or medium-term during the year, or to issue further tranches of previous issues in accordance with market conditions. The Treasury also reserves the right to use banking syndicate issue procedures.

The exact nature of the Treasury issues will be communicated to the market in the days preceding each auction with information on the volume of the issues.
