French government debt news

First issue of the OAT€ 3.15% July 25, 2032

Francis Mer, minister of the Economy, Finance and Industry, is delighted at the success of the first issue of a 30-year OAT (fungible Treasury bonds) linked to the euro-area Harmonised Index of Consumer Prices (excluding tobacco). Agency France Trésor allocated EUR 4 billion worth of the new OAT, for a total EUR 5.97 billion bid. The issued amount comprises EUR 3.09 billion in direct subscriptions and 0.91 billion to be exchanged for the inflation-indexed OATⁱ maturing in July 2029.

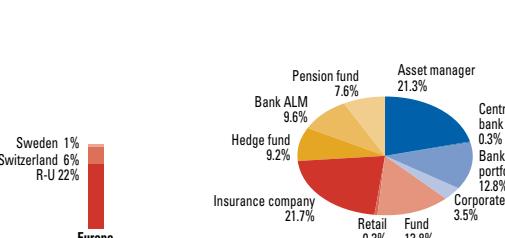

The large range of subscriber categories investing in this issue is comparable to what had been noted one year ago for the July 2012 OAT€ⁱ, also linked to the euro-area Harmonised Index of Consumer Prices (excluding tobacco).

And AFT created the course...

After launching the first European inflation-indexed bond in 2001, AFT has now created the real curve for this benchmark by proposing, on 24th October, to international investors a second issue on the 30-year end. This operation received a particularly warm welcome from the market and therefore confirms the structural interest from investors for this type of asset.

Always attentive to market opinion, AFT mandated four SVTs (Barclays Capital, BNP Paribas, Morgan Stanley and Natexis Banques Populaires) in July to analyse the structure of demand and determine the most consensual maturity for this new issue. Most key investors naturally opted for a 30-year issue and expressed the desire for a minimum level of liquidity, generally estimated at an immediate outstanding of between EUR 2.5 and 3 billion.

Following a number of visits to the foremost players in this type of asset (located in the main countries actively trading in this product), investors were found to be particularly interested. AFT is thus able to continue diversifying its investor base both in terms of geographic zone and category. For example, out of 150 orders, a third were distributed in France, a third in the rest of the euro zone and the remainder in the rest of the world. This is a similar distribution to that of the OAT€;2012 when it was launched in October 2001. In parallel, we have observed amongst key investors an increasingly marked interest from fund and asset managers and a sharp increase in interest from insurance companies and pension funds as well as from banks and corporates.

Investors have thus also confirmed their healthy appetite for a product that not only enables them to ensure better protection against the inflation risk but also an efficient and secure diversification in a particularly difficult investment context that is creating more and more interest for low volatility products.

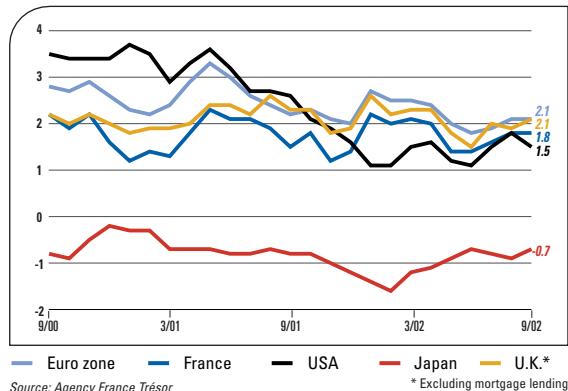

In total, more than EUR 6 billion of firm orders were collected from investors in record time as the order book was filled in less than three days and the operation was launched at the low end of the price range proposed to investors. This is why the real reoffer rate of 3.20% appeared perfectly consensual and the reduction of the issued amount to EUR 4 billion enabled the operation to gain in value on the grey market. As in 2001, AFT provided investors with the option of being able to exchange with the OAT; 2029, although this was deliberately limited in order to protect the liquidity of this issue.

By creating the European inflation-indexed curve, AFT is strengthening its position as a benchmark borrower in the world market. Henceforth, AFT will be able to offer four liquid issues (OAT; 2009 & 2029 and OAT€; 2012 & 2032) in order to satisfy increasingly recurrent investor demand for inflation-indexed products. In 2003, the priority will be given to boosting liquidity on the long end of the inflation-indexed curve. For the long term, AFT repeated its intention to devote around 10% of issuance to the inflation-indexed segment. This product therefore provides AFT with additional leeway in its issuing policy.

The Agency France Trésor reserves the right to cancel an auction listed on the calendar if exceptional market conditions warrant it, or to hold an extra auction according to its borrowing needs and market trends.

Furthermore, the State reserves the right to create new, long- or medium-term, lines during the year, or to issue further tranches of previous issues in accordance with market conditions. The State also reserves the right to use banking syndicate issue procedures.

The exact nature of the State issues will be communicated to the market in the days preceding each auction with information on the volume of the issues.
