French government debt news

Revision of the government funding program for 2002

The Supplementary Budget Bill for 2002 presented on 10 July by the Minister of the Economy, Finance and Industry and by the Minister Delegate for the Budget and Budgetary Reform provides for a € 15.6 bn increase in the budget deficit compared with the Initial Budget Act for 2002.

The government securities issuing program for 2002 has been revised to reflect this surge in government borrowing requirement. In addition to the € 13 bn announced last December, Agency France Trésor is planning to add another € 12 bn to its stock of BTFs, i.e. a total increase of € 25 bn for the year. By contrast, the medium and long-term borrowing program (OATs and BTANs) will remain unchanged.

Four banks to study new eurozone price-index-linked bond

Agency France Trésor has issued a working mandate to Banque Nationale de Paris – Paribas, Barclays Capital and Morgan Stanley as well as Natexis – Banques Populaires to develop the market of eurozone price-index-linked bonds, as announced on 11 July by Mr Mer, French Minister of the Economy, Finance and Industry.

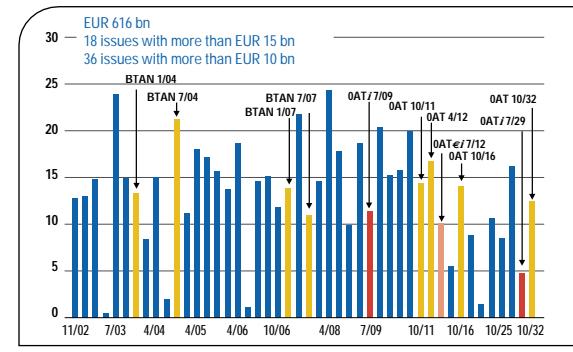

This study will determine the timeliness to launch a new eurozone price-index-linked bond (HICP excluding tobacco) and how to harmoniously co-ordinate this new bond with existing index-linked bonds. The French Minister of the Economy, Finance and Industry is expected to make a decision around the end of September based on the conclusions of this study and market developments.

The bond markets caught in the turbulence of the stock markets

Should we go along with the belief that market trends have become erratic or at least no longer reflect economic realities in the industrialized world? This certainly seems to be the question the markets have been asking themselves in recent months. Comparison with periods of extreme tension in the past suggests that the answer is 'No', at least insofar as the bond markets are concerned. The flight to quality during the crisis of 1998 probably offers the best illustration of this. The main conclusion is that long rate fluctuations are modest compared with the current correction of the equity markets in the euro area, similar to the fall recorded at the time (about 35%) and significantly steeper in the United States. So far, government bond yields in the euro area have fallen only one-third of the drop recorded five years ago.

There are two macroeconomic reasons for this. The first is that the G7 economies are currently in the upward leg of the cycle. The outlook has significantly improved since late last year, foreshadowing a rebound of activity, whereas the crisis of 1998 threatened to cut short a period of strong growth. This diagnosis is confirmed by the relatively accommodating monetary policies adopted in the main G7 countries, in contrast with the high key rates at the time, which implied declines ahead. The second reason is the high level of imported disinflation in 1997 and 1998 due to the collapse of commodities prices. While energy and good prices have

returned to normal levels, the underlying inflation in the euro area has risen significantly, to the point of causing some concern among the monetary authorities. Here it should be noted in passing that the sharper rate cuts by the Fed – exactly twice those by the ECB – are entirely consistent with economic fundamentals, particularly the excellent inflation figures recorded in the United States.

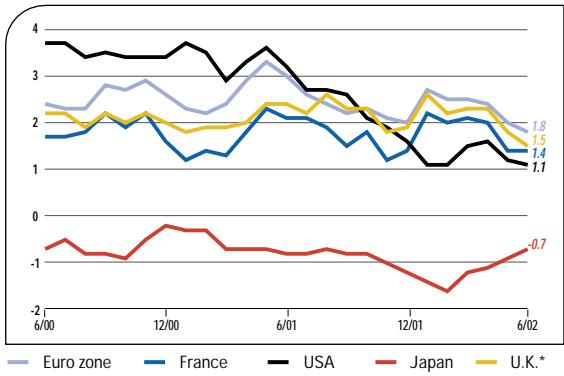

Based on this situation, the question is whether rates have been eased enough. This is no idle speculation. Remember that the looming growth shock in 1998 was *inter alia* prevented by the fact that the negative impact of collapsing stock markets was more than offset by rate cuts designed to establish attractive borrowing terms. What makes this issue especially relevant for Europe is the fact that European businesses are less debt-ridden than their American peers and, in contrast with the latter, are still waiting for profits to recover. Moreover, the impact of the stock market crash on Europe is doubled by the negative impact of the euro's sharp appreciation on exports to the United States and on the investments made in the American market in recent years.

So far, the bond markets in the euro area have shown remarkable composure and continue to anticipate a recovery. Let us hope that the future bears them out!

The Agency France Trésor reserves the right to cancel an auction listed on the calendar if exceptional market conditions warrant it, or to hold an extra auction according to its borrowing needs and market trends.

Furthermore, the State reserves the right to create new, long- or medium-term, lines during the year, or to issue further tranches of previous issues in accordance with market conditions. The State also reserves the right to use banking syndicate issue procedures.

The exact nature of the State issues will be communicated to the market in the days preceding each auction with information on the volume of the issues.

RAPPORT D'ACTIVITÉ 2001/2002 erratum

Une coupe malencontreuse s'est glissée dans le tableau de la page 18 du Rapport d'Activité 2001/2002. La liste complète des SVT dont la participation au marché primaire de la dette d'État française est supérieure à la moyenne est la suivante (par ordre décroissant de participation) :

2001

Crédit Agricole Indosuez
BNP Paribas
Morgan Stanley
Deutsche Bank
JP Morgan
Salomon Brothers
ABN Amro
Crédit Lyonnais
Goldman Sachs

2001/2002 ANNUAL REPORT erratum

On page 18 of the Annual Report 2001/2002, a mistaken shortening cut off the list of the primary dealers with over-average participation. It should read:

2001

Crédit Agricole Indosuez
BNP Paribas
Morgan Stanley
Deutsche Bank
JP Morgan
Salomon Brothers
ABN Amro
Crédit Lyonnais
Goldman Sachs
